

Early Years Tadpole Classes

The topic for this half term is **What a Wonderful World**.

This topic focuses greatly on the world around us. We will be looking at changes that take place in the environment linked to the seasons, especially focusing upon new life in the spring time. We will be growing plants, learning about what a seed needs to grow as

well as learning about the life cycle of animals including butterflies, tadpoles and chicks, some of which may be visiting our classroom so that we can observe the changes that take place for ourselves.

Important Dates and Information

- **Wednesday 1st May** Parents are invited to attend an open morning which will be filled with lots of activities linked to maths problem solving
- **Tuesday 21st May** Class visit to Stonehurst farm (see previous letter for details).

Next half term our topic will be **Sun, Sand and Sea Creatures**

Look out in the weekly This Week at School letters in your child's Home School Link Books for further information about this topic.
