Surprise Treat

For any of you tricksters out there, listen up – this one's for you! For this Easter magic trick, you'll need a large gift bag, a scarf, one small Easter egg and one large one. Place the large egg in the gift bag, putting the scarf on top. You can now trick the recipient into thinking you haven't got them an egg by placing your hands on either side of the bag and tipping it upside down. If you're holding the egg well enough, the scarf will fall out but not the egg, making them believe there's nothing in the bag. Then, place the small egg in, wave your scarf around for that magical effect, and pull out their real, giant egg!

Day 17 You are asked to build a new robot to defend them.	Day 18 The king has been taken over. They are impressed by your power. They want you to build one for them.	Day 19 There is a wizard. You will need to build a snowmobile.	Day 20 What was your favorite day?

How to Grow a Rainbow

You will need:

- Kitchen roll/paper towel
- Felt tip pens
- Two small bowls of water
- Paper clip
- Thread

1. Cut your kitchen roll into the shape of a rainbow.
2. Colour a rainbow with felt tips about 2 cm up on both sides.
3. Attach your paper clip to the top and tie a piece of thread to it. This will give you something to hold your rainbow with.
4. Fill each small container with water.
5. Hold your rainbow with the ends slightly submerged in the water then watch your rainbow grow!

THE SCIENCE

A brief introduction to 'capillary action'! Water molecules like to stick to things - including themselves. Sticking to things is called *adhesion* and sticking to itself is called *cohesion*. The fibres in kitchen roll make lots of little holes. Water is 'sucked' through the holes because of adhesion (liking to stick to other things) and cohesion (liking to stick to itself) means the rest of the water follows. The water pressure will eventually slow down and the pressure of gravity will mean it stops moving.
