

Year 5 Owls Curriculum Work Summer 1

Choose one or of two of the activities below per week. Activities can be completed in any order.

We have a new topic this half term – **Allotment**. This topic is focused on Geography. It's all about food, agriculture and plants.

<p>Activity 1 Geography: Different types of farming in the UK. Look at the information sheet 'Different types of farming in the UK' on the school website. Create a poster, information page or PowerPoint to explain the three main types of farming in the UK. You may want to do some more research.</p>	<p>Activity 2 Geography: How many foods can you find at home that come from different countries? Packaging will often tell you where food comes from but you may need to do some research. Find the countries on a world map (there is one on the school website you can use). Record what you find in your workbook. You may want to use the blank world map (on the school website) to record where the food comes from.</p>	<p>Activity 3 Geography: From farm to fork. Find out how food gets from the farm to the supermarket. Choose one of the foods below: tomatoes, potatoes, broccoli, beef, salmon Watch the video clip, then create a cartoon strip to show the process of how that food gets from the farm to you.</p>	<p>Activity 4 Geography: What is cacao? Watch this short film about cacao. What is it made into? Find some countries where cocoa grows. What do these countries have in common? Mark the countries on a blank world map (there is one on the school website that you can download)</p>
<p>Activity 5 Geography: Watch 'Unravelling the thread – the story of cotton'. This film is all about the production of cotton and fair trade. Design a poster or information page to show how fair trade helps cotton farmers to have better lives.</p>	<p>Activity 6 Science: Get to know nature! Choose one or more of the spotter or scavenger hunts found here. There are lots to choose from including, leaves, trees, butterflies, flowers and minibeasts. You could complete it at home in the garden or while out on your daily exercise.</p>	<p>Activity 7 Design Technology: Design your own garden. Make a detailed, labelled plan, showing what you would grow and any other features of your garden. Challenge: If you're feeling ambitious, you could make a miniature version of your garden as a model or even using real plants. (There are some great ideas for miniature gardens online.)</p>	<p>Activity 8 Design Technology: Recycle your clothes! Use an old cotton sock, t-shirt or pillowcase to make a new piece of clothing, a bag or a toy. Check with an adult before making anything! Record what you made with a drawing or photograph.</p>
<p>Activity 9 Design Technology: Cook something! You could bake a cake or some bread, cook the dinner – whatever you like! Always check with an adult before you cook anything. Record what you have cooked with a drawing or a photograph.</p>	<p>Activity 10 Art and Design: Create still life drawing or painting that includes food. You may find it helpful to look at the Still life information sheet on the school website to give you some ideas.</p>	<p>Activity 11 Art and Design: Design food packaging. Design the packaging for a sweet or savoury food. Use the sheet 'Food packaging and labels' on the school website to help you. If you're feeling ambitious, you could make the packaging too!</p>	<p>Activity 12 Computing: Create a game using Scratch online. You can use one of the tutorials here to help you. If you want to use Kodu instead, you can download it for free from the Microsoft store onto your computer or Xbox. Always check with an adult before you download any software.</p>

If you have any questions or need support with any of the learning activities, you can contact me via the class email year5@hallbrook.leics.sch.uk.

This email will be checked during normal school hours and I will respond as soon as possible.

Thank you, Mrs Cawrey
