

MIRROR SHAPES: CHALLENGE 2

Work in pairs. Take turns, with one of you holding the mirror and the other drawing or writing.

Draw some shapes and see what they look like in a mirror.

- 1 Draw a simple shape, such as a triangle or star.
- 2 Ask your partner to hold a mirror behind the shape.
- 3 Look at the reflection of the shape in the mirror. Try to draw around the shape with a different-coloured pen.

DO NOT look directly at the shape; you must look in the mirror.

When you have tried a few shapes, write down anything you have learned about shapes and mirrors.

Include hints to help someone trying to do the same activity you have just done.
